## 1.0 Introduction

Welcome to UETCL ICT Department and IT Section in particular. Its now more than two weeks since you joined us and my hope is that you are done with all the orientation needed by HR. Therefore, its time to embark on the technical details. This allocation schedule serves to bring you on board for both existing business applications and ongoing projects under your jurisdiction. For the existing business applications already in production, you will be required to study and write a report on what it is that you need to support and maintain the applications smoothly. As for the ongoing system projects you will be required to assess each and provide an inception report as described in section 4.0 of this schedule.

## 2.0 Allocation of Existing Systems

| #  | Application Name                                | Application Function                                                                                                | OS/DB                                | Key Users / Vendor                             | Assigned To                                                                |
|----|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|--------------------------------------|------------------------------------------------|----------------------------------------------------------------------------|
| 1. | SUN System                                      | Accounting (Ledger, Inventory, Asset management, Order Processing)                                                  | Windows Server 2008 R2<br>MSSQL 2008 | Finance<br>Commercial<br>Procurement<br>Flaxem | <b>Enoch Kajoba</b><br><i>Join Chillion<br/>Mukonyezi</i>                  |
| 2. | HR/Payroll System – Future Gateway              | Human Resource and payroll                                                                                          | Windows server 2008 R2<br>MSSQL 2012 | Finance<br>HR<br>Future Technologies Ltd.      | <b>Enoch Kajoba</b><br><i>Join Edward<br/>Kanyarusoke and<br/>Chillion</i> |
| 3. | Geographical Information System – Planning tool | Grid Planning and evaluating of Grid assets positioning                                                             | Windows Server 2012 R2<br>MSSQL 2008 | Planning<br>GIC                                | <b>Enok Kajjoba</b><br><i>Join Joel Jombwe</i>                             |
| 4. | Wayleaves Information System (WIS)              | Management and Compensation of the PAP (Person, Payment, property,) Packages Review, Batching, Grievances, PAP Docs | Windows Server 2008 R2<br>MSSQL 2008 | Land Acquisition<br><br>No vendor support      | <b>Delta Karuhaga</b><br><i>Join Joseph<br/>Musiitwa and<br/>Chillion</i>  |
| 5. | Fleet Management System – Road Based            | Used for monitoring mileage, location of the vehicle, detect driver behavior. It's monitored by Victoria motors     | Windows Server 2003<br>MSSQL 2008    | Transport Unit<br><br>Victoria Motors          | <b>Delta Karuhanga</b><br><i>Join George<br/>Ofoyilu</i>                   |

| #   | Application Name                  | Application Function                                                      | OS/DB                                 | Key Users / Vendor                                 | Assigned To                                                           |
|-----|-----------------------------------|---------------------------------------------------------------------------|---------------------------------------|----------------------------------------------------|-----------------------------------------------------------------------|
| 6.  | Budget Information System         | Manage the procurement process, checks requests against the annual budget | CentOS 7<br>MySQL                     | Finance<br>No vendor support                       | <b>Delta Karuhanga</b><br><i>Join Joseph Musiitwa and Chillion</i>    |
| 7.  | Spice Works                       | Help Desk tool, for managing tickets                                      | Cloud based                           | IT<br>No vendor support                            | <b>Enoch Kajoba</b><br><i>Join Hellen</i>                             |
| 8.  | Info Router                       | Document Management System                                                | Windows Server 2012 R2<br>MSSQL 2012  | HR – Admin<br>Syscorp International                | <b>Enoch Kajoba</b><br><i>Join Moses, Karim and Jeremy</i>            |
| 9.  | Team Mate                         | Audit management tool                                                     | Windows 2016 Standard<br>MSSQL 2012   | Internal Audit<br>Wolters Kluwer                   | <b>Enoch Kajoba</b><br><i>Join Chillion</i>                           |
| 10. | UETCL Billing & Receipting System | Used for billing purposes                                                 | Windows 2016 Standard<br>MSSQL 2012   | Commercial<br>Flaxem                               | <b>Delta Karuhanga</b><br><i>Join Joseph Musiitwa</i>                 |
| 11. | SharePoint /UETCL Connect         | Workflow for financial requests and document Review                       | Windows Server 2012 R2<br>MSSQL 2008  | IT on behalf of all<br>Computer Revolutions Africa | <b>Delta Karuhanga</b><br><i>Join Chillion and Hellen</i>             |
| 12. | Time and attendance               | Used to track when employees start and end their working shifts           | Windows server 2012 R2<br>MS SQL 2008 | HR<br>No vendor support                            | <b>Delta Karuhanga</b><br><i>Join J.Ochaya</i>                        |
| 13. | Convene                           | E-Board Meetings Platform                                                 | Linux                                 | Company Secretary<br>Future Technologies Ltd       | <b>Enoch Kajoba</b><br><i>Join Karim and Jeremy</i>                   |
| 14. | Auto CAD                          | Computer Aided Design for Planning team                                   | Windows server 2012 R2                | Planning                                           | <b>Enoch Kajoba</b><br><i>Join Joel Jombwe and Edward Kanyarusoke</i> |
| 15. | PSSE                              | Grid planning and simulation tool                                         | Windows 11 Pro                        | Planning                                           | <b>Enoch Kajoba</b><br><i>Join Joel Jombwe</i>                        |
